EDUCATION

University of Toronto <i>Bachelor of Science</i> (cGPA: 3.81)	Toronto, Ontario
• <i>Bioinformatics and Computer Science</i>	
Ashbury College <i>International Baccalaureate (French)</i>	Ottawa, Ontario
• <i>Merit Award Scholarship</i> (offered to less than 5% of students)	

WORK EXPERIENCE

Software Engineering Intern <i>Factors Education</i>	Toronto, Ontario <i>September 2022 - October 2023</i>
- Co-Lead the construction of React, Flutter, and Streamlit (Python) product demos that directly contributed to over \$85 000 in seed stage funding. - Collaborated with teams of UI Designers, data scientists, and developers to create engaging data visualization components for PyTorch sentiment analysis data. - Implemented Google and Microsoft Federated user authentication mechanisms via AWS Cognito. - Hosted EC2 based web applications on AWS Route 53, ensuring high availability and scalability. - Implemented the end-to-end development of web applications, integrating front-end and back-end components using NodeJS and Express. - Created user friendly, responsive components in Flutter and React for the company's Data Dashboard, Landing Page, and Platform. - Adhered to industry standard practices for code documentation and GitHub project organization within a Scrum Framework (Agile).	
Undergraduate Researcher in Machine Learning <i>Victoria University</i>	Toronto, Ontario <i>January 2024 - Current</i>
- Cleaned and labeled datasets for the fine-tuning of ChatGPT 3.5 Turbo for enhanced model performance and accuracy in natural language understanding tasks. - Developed a CustomGPT to extract and compile theories from academic papers into structured a CSV format to facilitate data preprocessing. - Engineered and implemented code templates for CSV file generation and data structuring. - Acquired a \$2000 Vic Global scholarship to discuss the methodology and outcomes of my research at the Lisbon Scientonomy Workshop 2024.	
Research Team Member Ashbury MSOE Center for Biomolecular Modeling SMART Team	Ottawa, Ontario <i>September 2018 - May 2019</i>
- Contributed to literature reviews and protein modeling for <i>The Effects of XIAP and Alzheimer's Disease</i>. - Worked alongside researchers and medical professionals across Ontario to present their research. - Utilized 3D printing technology to create physical models of the protein XIAP using Jmol, Java based imaging tool. - Readied to present findings at the American Society for Biochemistry and Molecular Biology Conference(COVID canceled).	
Computer Science and Math Tutor <i>TeacherOn</i>	Toronto, Ontario <i>May 2022 - Present</i>
Organized tutoring sessions for up to 10 hours a week for multiple students during the school year.	

Andrew Wong

Toronto, Ontario | 613-668-8322 | andrewmc.wong@mail.utoronto.ca

Website: amcwong.onrender.com

- Communicated math and **Python** concepts to university, high school, and primary school students.
- Fostered a fun and engaging atmosphere, to help students find confidence in their learning abilities.

Science and Technology Camp Leader

Académie de la Capitale IB World School

Ottawa, Ontario

June 2022 - August 2022

- Planned and organized engaging STEM activities for a diverse group of over 100 campers aged 5-14.
- Led a team of counselors, providing guidance and support, to ensure program implementation.
- Motivated campers to explore science with enthusiasm and curiosity through learning exercises.

Swimming Instructor and Lifeguard

Canterbury Pool

Ottawa, Ontario

September 2019 - March 2021

- Developed and executed over 150 individualized lesson plans, catering to the specific needs and skill levels of up to 60 children per week.
- Assisted parents in selecting appropriate swim programs based on their children's abilities and goals.
- Responded promptly and effectively to first-aid incidents, demonstrating a strong knowledge of lifesaving techniques and emergency protocols.

PROJECTS

Auto Dresser

October 2021 - November 2021

- Developed a **Python** program using PythonAnywhere to text subscribers of a mailing service what type of clothes they should wear that day according to the weather in their area.
- Utilized the OpenWeatherMap and Twilio APIs for weather data and SMS messaging.

University of Toronto Course Enroller

September 2022 - October 2022

- Employed Selenium Webdriver to make a **Python** executable program which utilizes ChromeDriver to automatically enroll a student in their non-waitlistable courses.
- Saved students up to \$1200 in courses by almost ensuring their prerequisite enrollment during the year.

Portfolio Website

September 2022 - December 2022

- Launched a website on Heroku with a React frontend and Node.js backend to present my skills.
- Administered the backend for a custom mail component that facilitates tutoring contacts.

SKILLS AND INTERESTS

Programming Languages: Python, R, C, Javascript (HTML and CSS), Java, Dart, JSX, SQL, Haskell

Tools and Libraries: GitHub, CLIs (Bash, Terminal, Command Line), Axios, Selenium, jQuery, Bootstrap, pandas,

Frameworks and Services: PyTorch, TensorFlow, React Native, React, Node.js, Flask, Django, Next.js, Express.js, Flutter, AWS, DynamoDB
